Serial No.: 10/767,044

RESPONSE  
TO OFFICE ACTION

7. (Original) The method of claim 1, wherein the multi-image file comprises a menu element.
8. (Original) The method of claim 1, wherein the markup language tag comprises an HTML code.
9. (Currently Amended) A web page, comprising:
  - a multi-image file, the multi-image file comprising a plurality of images including a primary image and at least one secondary image adapted for cooperative display; and
  - a markup language tag, the markup language tag comprising a code specified specifying which of the plurality of images primary image and the secondary image should be displayed.
10. (Original) The web page of claim 9, wherein the multi-image file further comprises an image descriptor associated with the primary image and an image descriptor associated with the at least one secondary image.
11. (Original) The web page of claim 10, wherein the image descriptor comprises an image name, a primary image indicator, and a default size.
12. (Original) The web page of claim 9, wherein the multi-image file further comprises an information header containing at least one image descriptor.

RESPONSE  
TO OFFICE ACTION

13. (Currently Amended) A method of displaying images, comprising:

receiving a multi-image file, the multi-image file comprising a plurality of images including a primary image and at least one secondary image;  
selecting an image for display from the multi-image file; and  
displaying the selected image.

14. (Original) The method of claim 13, wherein the multi-image file further comprises a first image descriptor associated with the primary image and a second image descriptor associated with the secondary image.

15. (Original) The method of claim 13, wherein the first image descriptor comprises a primary image indicator.

16. (Currently Amended) A computer program product, comprising:

(a) a program configured to perform a method for rendering images in a computer system, the method comprising:

receiving a multi-image file, the multi-image file comprising a plurality of images including a primary image and at least one secondary image;  
selecting an image for display from the multi-image file; and  
displaying the selected image; and

(b) a signal-bearing computer readable media bearing the program.

17. (Original) The computer program product of claim 16, wherein the program comprises a web browser.

RESPONSE  
TO OFFICE ACTION

18. (Currently Amended) The computer program product of claim 16, wherein the signal bearing computer readable media is chosen from the group consisting of information permanently stored on non-writable storage media; alterable information stored on writable storage media; and information conveyed to a computer by a communications medium.
19. (Original) The computer program product of claim 16, wherein the primary image and the at least one secondary image comprise complementary layers.
20. (Original) The computer program product of claim 16, wherein the primary image and the at least one secondary image comprise alternative versions of an image.
21. (Original) The computer program product of claim 16, wherein the at least one secondary image overlays the primary image.
